ANKHOR DENTAL LAB

Digital Workflow Consultation

An individualdiscussiontohelpyourclinicplanapracticaldigitalworkflowforlaboratory cases.

Consultation details

- One introductoryconsultation of up to 45 minutes can be arranged by appointment.
- The discussion may be conducted remotely or at Ankhor's premises, subject to availability.

Areas we can discuss

- Your currentintraoral scanning workflow and the files normally submitted to the laboratory.
- Digital prescriptions, case references and a consistent method for transferring scan data.
- Coordination of IOS files, implant scanbody data, clinical photographs and laboratory instructions.
- Common causes of incomplete digital submissions and ways to reduce avoidable clarification.
- Use of 3D-printed models and other digital laboratory support where appropriate.
- Workflow considerations for crown-and-bridge, implant and full-arch prosthetic cases.

What to prepare

- Briefly describe thetypes of cases your clinic handles and the scanner or digital equipment in use.
- Bring a sample workflow or appropriately authorised case data if you want to discuss a specific submission.
- List the main difficulties your team experiences when transferring cases to a dental laboratory.

What you receive

- Afocused discussion of your current workflow and the information required for laboratory coordination.
- Practical suggestions for improving case submission and communication.
- Identification of any additional technical review or equipment support that may need a separate quotation.

Scope and limitations

- Theconsultationisaworkflow discussion, not a clinical diagnosis, treatment plan, implant plan or guarantee of clinical outcome.
- Detailed CAD design, file repair, scanner installation, software integration, on-site implementation and equipment procurement are not included unless separately agreed.
- Recommendations depend on the equipment, software, case type and information made available during the consultation.

Booking

- Contact Ankhor with your preferred date, consultation format and a short description of the workflow you wish to discuss. Any extended or on-site engagement will be scoped and quoted before confirmation.

For appointments, current forms or case-specific enquiries, contact Ankhor Dental Lab through your usual communication channel.
