ANKHOR DENTAL LAB

Intraoral Scanning Demonstration

A practicaldemonstrationofdigitalscancaptureandthetransferofscandataforlaboratory work.

Demonstration details

- One introductorydemonstration of up to 60 minutes can be arranged by appointment, subject to equipment, operator and schedule availability.
- The demonstration is intended to familiarise the clinic team with the digital scan-to-laboratory workflow.

Demonstration topics

- Basic preparationofthe scanner and scanning environment, within the functions supported by the device.
- Typical scan sequence for the required arch, preparation area, opposing arch and bite record.
- Common visible scan deficiencies, including missing areas, stitching interruptions and incomplete capture.
- Exporting and identifying the files needed for a crown-and-bridge or implant prosthetic submission.
- Transferring the files with the relevant prescription and case reference.

What the clinic receives

- A guideddemonstration of the standard scanning and file-submission workflow.
- A short checklist of key scan records commonly required for laboratory submission.
- An opportunity to discuss the clinic's scanner model and the digital workflow relevant to its cases.

Before the appointment

- Confirm thescannerbrandand model, software version if known, and the type of case to be demonstrated.
- Arrange access to the scanner and a suitable workstation.
- Use a demonstration model or appropriately authorised case data. Patient scanning should only take place with the clinic's usual consent and clinical safeguards.

Scope and limitations

- Thisis ademonstration, not a certification course or a substitute for the scanner manufacturer's training.
- Actual intraoral scanning of a patient, a complete clinical scanning course, scanner installation, software configuration and troubleshooting are not included unless separately agreed.
- Scanning performance and compatibility depend on the device, software, operator and clinical conditions.
- Ankhor's current price list identifies IOS scanning services as in-lab services. Clinic-side scanning or scanning at the clinic must be confirmed separately before it is advertised or booked.

Booking and charges

- ContactAnkhor to confirm whether the demonstration can be provided at the clinic or at Ankhor's premises. Any additional visit or scanning service will be quoted separately before confirmation.

For appointments, current forms or case-specific enquiries, contact Ankhor Dental Lab through your usual communication channel.
