Preparation and Impression Checklist

A practicalchecklisttohelpclinicssubmitcompleterecordsforconventionalanddigitalrestorativecases.

Before submitting a case

- Confirm the requestedrestoration, tooth number or region, number of units and material.
- Record the shade, stump shade and relevant aesthetic instructions where applicable.
- Check that the preparation is clearly represented and that the finish line is visible in the impression or digital scan.
- Confirm that the opposing arch and bite record are included when required.
- Ensure that adjacent teeth and relevant soft-tissue areas are adequately captured.

For digital submissions

- Check that theupper arch, lower arch, preparation scan and bite record are correctly identified.
- Review the scan for obvious holes, missing regions, stitching interruptions or incomplete capture.
- Confirm that the preparation area and apparent margin region can be viewed clearly.
- Include scanbody data and implant system/platform details for implant prosthetic cases.
- Use a clear clinic case reference and attach the completed digital prescription.

For conventional impressions

- Usean appropriateimpressiontray and material for the clinical situation.
- Check that the impression captures the preparation, finish line, adjacent teeth and relevant soft tissue without visible voids or tears.
- Include the opposing arch impression or model and an accurate bite registration where required.
- Disinfect, package and label the impression and related records according to the clinic's infection-control and transport procedures.
- Include the requested shade information and laboratory instructions.

Case information to include

- Clinic name,contactpersonandclinic case reference.
- Tooth number or region, restoration type, units and requested material.
- Shade, stump shade and aesthetic notes, where applicable.
- Opposing arch and bite record details.
- Implant system, platform, scanbody and component details for implant cases.
- Requested date and any urgency request. Ankhor will confirm the accepted schedule separately.

Important limitations

- Thischecklist isasubmission aid and does not replace clinical examination, diagnosis, treatment planning or the dentist's own clinical quality checks.
- Ankhor may request additional records or a new scan/impression if the submitted information is incomplete or unsuitable for the requested laboratory work.
- Case acceptance and delivery timing are confirmed after review of the complete submission.

Need assistance?

- Contact Ankhor before dispatch if you are uncertain which records or files are required for a particular restoration.
